News Update for South Australia.

[ICN Gateway](#) | [Join](#) | [Upgrade](#) | [Contact](#)

Welcome

It's been a busy year so far in South Australia with the North-South corridor progressing: construction is well underway on the Torrens Road to River Torrens section, Gateway South is starting on the next stage with the Darlington Upgrade and Lendlease was awarded the contract for the Northern Connector. The North-South Corridor is one of Adelaide's most important transport corridors - it is the major route for north and south bound traffic

including freight vehicles running between Gawler and Old Noarlunga, a distance of 78 kilometres. Other projects in South Australia include construction underway on the O-Bahn City Access Project, BP's preliminary works for its exploration in the Great Australian Bight and Leigh Creek Energy's in situ coal gasification demonstration plant. Stay tuned on [ICN Gateway](#) for updated work packages and major project information.

Project News

BAE Systems Industry Tour

BAE Systems has been collecting registrations of interest for the LAND 400 Australian combat vehicle program bid with Patria of Finland on [ICN Gateway](#) since December 2014. Around 70 potential suppliers, along with ICN SA, attended the industry tour on June 9 and viewed the proposed AMV35 combat reconnaissance vehicle.

Connecting the North

Lendlease has been awarded the contract for the Northern Connector road project, a multi-lane motorway that links the current Northern and Port River expressways with South Road. The project scope involves a new six lane, 15.5 kilometre non-stop motorway to the west of Port Wakefield Road with three lanes in each direction posted at 110km/h. It will link the Northern Expressway with the South Road Superway and the Port River

Gateway to Darlington

Presentations from the Industry Briefing at South Adelaide Football Club on 11 May 2016 are available on the [Darlington Upgrade project portal](#) on ICN Gateway. Work packages are available for expressions of interest, with more being released in the coming weeks and months. Work packages on the project portal can be viewed [here](#).

GMUSG & SACOME Conference and Trade Expo

The 12th annual GMUSG & SACOME trade expo returns to Port Pirie's Northern Festival Centre this August. New features will include the nuclear fuel cycle, defence industry and Northern Territory supplier opportunities. As usual, industry overviews from state and national, industry and political leaders, as well as presentations by South Australia's leading mining, metals, oil and

Expressway, providing an unimpeded journey from Gawler to Regency Park. Work packages will be listed periodically on the ICN Gateway project portal as the works progress. An Industry Briefing will be held on 23 August 2016 at Central Districts Football Club. Register [here](#).

Torrens Rail Junction Project

The existing Torrens Junction represents a productivity constraint to the Adelaide to Melbourne section of the national freight rail network. The junction is an at-grade crossing of the interstate freight rail mainline and the Outer Harbour passenger line. The concept design for the Torrens Rail Junction project includes grade separation of the Park Terrace (part of the Inner Ring Road Route) and the Outer Harbour passenger railway line, elimination of the existing level crossing. The South Australian Government is expecting to award an Alliance type contract in December 2016, with site works anticipated to commence early in 2017. Register for 'Any Opportunities' [here](#).

gas producers will be included. This is a must-attend event for anyone doing business in the resources and energy sectors. The event runs from 16-18 August and further information can be found [here](#).

Department of State Development uses ICN

South Australia's Department of State Development procurement team is connecting with a new source of potential suppliers - businesses registered on ICN Gateway. The Department is currently seeking information from industry for the Government Building Energy Efficiency Investment (GBEEI) program which aims to reduce the Government's energy use and operational costs by improving the energy efficiency of the government owned buildings. Further information can be found [here](#).

Have your Say

The Department of State Development is conducting a survey of the Mineral and Energy Services sector in South Australia to ensure the programs and initiatives targeted to industry provide the best outcomes for operators and suppliers. If you're a supplier to the mineral and energy sector in South Australia, please fill in the survey [here](#). It will only take about 10 minutes and responses are confidential.

Case Study - Ottoway Engineering

A vital cog in exploration drilling program

South Australia's first drilling fluid supply base is taking shape as local industry excitement grows in BP's Great Australian Bight Exploration Drilling program. Approximately 1000 companies across industry sectors have registered an interest in participating in the landmark project, which is generating much needed economic activity for the state. Read the full case study [here](#).
